A QUARTERLY JOURNAL OF ORNITHOLOGICAL RECORD PUBLISHED BY THE AMERICAN BIRDING ASSOCIATION

Volume 55: No.4, 2001 • June 2001–July 2001

THE NESTING SEASON

SWAROBRIGHT®

THE NEW STANDARD FOR BRIGHTNESS IN BINOCULARS

Like our renowned E L Binoculars, the new SLC Class of 42, 50 and 56 MM binoculars incorporate unique interference mirrors in their roof prism systems that reflect 99.5 % of the available light. SWAROBRIGHT® mirror coatings deliver the highest image brightness and color contrast available from any premium binocular at a competitive price.

With SWAROBRIGHT®, you will receive as much as 5 % to 10 % more light transmission from our new SLC Binoculars. That's more total light transmission and contrast than any other premium binocular on the planet except our E L Class!

Whatever image you're looking at, from edge to edge it will be brighter, sharper and the colors more true to life than you've ever seen before. But, don't take our word for it. See the New Standard for yourself! Visit www.swarovskioptik.com or call 800-426-3089 for more details and the dealer nearest you.

Like airports most everywhere, the Sarnia Airport authorities in Lambton County, Ontario, mow the grass every summer. One unfortunate consequence of the mowing is the destruction of eggs or chicks of local Upland Sandpipers. Only one adult returned this year to the Sarnia airport grounds and set up territory in a bit of "no-man's-land." This and other grassland species struggled with widespread drought in the continent's interior this season, but some species were nonetheless reported to be doing well *Photograph by Alfred Rider*

NORTH AMERICAN BIRDS

is published by the American Birding Association.

The mission of the journal is to provide a complete overview of the changing panorama of our continent's birdlife, including outstanding records, range extensions and contractions, population dynamics, and changes in migration patterns or seasonal occurrence. We welcome submission of papers in these areas; papers and other communication should be sent to the Colorado Springs address below.

**Victory
binoculars
make birds
look up to 7%
brighter.**

Victory 8x40

Victory 10x40

Victory 8x56

Victory 10x56

It's twilight, with the sighting of a lifetime in range. Victory binoculars were made for this moment. Thanks to patented lens and prism coatings, they transmit more light to the eye. So birds appear brighter in low light. All four Victory models are backed by a lifetime warranty. For a Zeiss retailer near you, call 1-800-338-2984 or visit zeiss.com.

*Based on blue, red and green light transmission tests. Data on file.

Going Birding?

Sylvia Warblers

Hadoram Shirihai, Gabriel Gargallo, and Andreas J. Helbig

Princeton University Press; published 2001; 572 pages; cloth

This is the most complete manual available on the large family of insectivorous passerines. Covers 22 species of Old World warblers Sylviidae with 20 color plates and 546 color photographs.

Item #893, ABA Sales Price \$75.00

A Birder's Guide to Metropolitan Areas

Paul E. Lehman, compiler

ABA Birdfinding Guide Series; published 2001; 504 pages; wire-O

This is the first guide to cover North America city-by-city. The birding trips visit most significant habitats in the 400 sites.

Item #234, ABA Sales Price \$25.95 (List Price \$27.95)

Hummingbirds of North America

Steven N. G. Howell

Academic Press; published 2001;

272 pages; paper

This book is the first comprehensive photographic guide to the identification of all 24 species of hummingbirds to be seen as breeders or vagrants in North America.

Item #805, ABA Sales Price \$27.95

Raptors: Birds of Prey of the World

James Ferguson-Lees and

David A. Christie

Pica Press; Published 2001;

872 pages; cloth

This guide covers more than 300 of the world's raptors with details about habitat and distribution, food, and breeding. Includes 112 color plates and 300 distribution maps.

Item #711, ABA Sales Price \$60.00

RAPTORS OF THE WORLD

James Ferguson Lees and David A. Christie
Illustrated by Jon Frowde, David Mind and Philip Ruxton

Guide to the Offshore Wildlife of the North Atlantic

Michael H. Tove

University of Texas Press; 2000;

250 pages; paper

All the air-breathing offshore wildlife of the Northern Atlantic can be found in this one comprehensive guide to all the birds, whales, dolphins, seals, and sea turtles.

Item #1128, ABA Sales Price \$22.95

(List price \$24.95)

How to Read the Regional Report

STANDARD ABBREVIATIONS USED IN THE REGIONAL REPORTS

Abbreviations used in place names

In most regions, place names given in *italic* type are counties. Other abbreviations:

A.F.B.	Air Force Base
B.B.S.	Breeding Bird Survey
C.B.C.	Christmas Bird Count
Cr.	Creek
Ft.	Fort
Hwy	Highway
I.	Island or Isle
Is.	Islands or Isles
Jct.	Junction
km	kilometer(s)
L.	Lake
mi	mile (s)
Mt.	Mountain or Mount
Mts.	Mountains
N.F.	National Forest
N.M.	National Monument
N.P.	National Park
N.W.R.	National Wildlife Refuge
P.P.	Provincial Park
Pen.	Peninsula
Pt.	Point (not Port)
R.	River
Ref.	Refuge
Res.	Reservoir (not Reservation)
S.P.	State Park
Twp.	Township
W.M.A.	Wildlife Management Area
W.T.P.	(Waste) Water Treatment Pond(s) or Plant

Other abbreviations and symbols referring to birds:

ad. (ads.)	adult(s)
imm.	immature
juv. (juvs.)	juvenile; juvenile(s)
ph.	photographed
sp. (spp.)	species (plural)
subad. (subads.)	subadult(s)
tape	audio tape-recorded
v.t.	videotaped
†	written details were submitted for a sighting
*	a specimen was collected

Birds have no respect for range maps. Bird distribution in North America is constantly changing, as birds expand their ranges into new areas, disappear from former strongholds, or alter their patterns of migration.

Our knowledge of bird distribution is also changing constantly, as discoveries continue to come in. Keeping up with all these developments is a challenge for ornithologists, conservationists, and birders.

The Regional Reports, published four times a year, contain a wealth of information about North America's dynamic birdlife. When seeing the reports for the first time, they might appear difficult or technical, but they are not; anyone with any birding experience will find the reports easy to understand. We invite you to read the report from your area of the continent; we predict that the information there will alternately surprise you and confirm your ideas about birdlife in your region. To help you get started, here are answers to some questions that may occur to first-time readers.

What kind of information is included? Do the Regional Editors just report everything that's reported to them?

Regional Editors do not report every sighting of every bird. Such a list would be huge, unwieldy, and not very useful. Instead, they solicit reports from as many observers as possible, screen the records for accuracy, choose those that are most significant, look for trends and patterns of occurrence, connect scattered bits of information, and ultimately come up with a concise, readable summary of the real bird news—the important avian events and trends of the season throughout their region.

Why are there so many abbreviations in the text?

We abbreviate some frequently-used words and phrases to save space. Most of these are easy to understand and remember. (See the list of abbreviations at the end of this section.) In addition to these standard abbreviations, some Regional Editors use shortened versions of the names of some birding hot spots; they list these local abbreviations in a separate paragraph, just after their introductory comments and just before their main species accounts.

What do the initials in parentheses mean?

Most records published in each report will be followed by initials, to indicate the source: the person(s) who found or reported the bird(s) mentioned. The initials may be followed by *et al.* (short for *et alia*, meaning "and others"), or preceded by *fide* (literally, "by the faith of"—meaning that this is a second-hand report, and the person initialed is the one who passed it along to the Regional Editor). A dagger (†) before the initials means that this person turned in written details on the sighting.

There are good reasons for giving credit to the observers involved. Readers may be reassured about the accuracy of surprising sightings if they know who the observers were; researchers who want to know more about a certain record may be able to contact the observers directly. In some cases, when a bird was seen by many birders, the Regional Editor may add "v.o." (for "various observers") or "m.ob." (for "many observers") after the first sets of initials.

Who are the people who send in their sightings?

All observers are invited to send in notes to their Regional Editors: details on rare sightings, species that were scarcer or more numerous than usual during the season, unusual concentrations or migration, and so on. Reading the reports for your region for a few seasons is the best way to find out what kinds of information are desired. Although the Regional Editors cannot cite every record that they receive, every contributor helps them to produce a more thorough and accurate summary.

Why are some bird names in heavier or blacker type?

We use **boldface** type to draw attention to outstanding records of rare birds. General categories of birds that the Regional Editors would place in boldface would include: any species that has been recorded fewer than 10 times previously in a given state or province; any new breeding record for a state or province, or any bird totally outside established patterns of seasonal occurrence. (For the most part, records are not boldfaced unless they are backed up with solid details or photographs.) Birders who like to know about rare birds (and most of us do) can get a complete run-down of the season's outstanding rarities by scanning all the Regional Reports for those boldfaced birds.

Why are some of the place names in italic type?

In most of the regional reports, place names given in *italic* type refer to counties. (Italics represent parishes in Louisiana, and in parts of Ontario they may refer to districts or regional municipalities.)

What are the boxes in the text marked "SA"?

"SA" stands for "Special Attention" (and, by coincidence, is pronounced "essay"). The purpose of the boxed essays is to draw attention to particularly noteworthy phenomena or trends. Likely SA topics include new population trends or new bird distribution patterns, unusual invasions or migration events, field research yielding new data, specific conservation problems that have an impact on birdlife, or detailed discussion of an outstanding (or perplexing) rare bird record. Experienced readers of *North American Birds* make it a point to flip through all the Regional Reports and read all the S.A.s, even in regions where they do not read the rest of the text.

MORE PRIZES! MORE WINNERS! MORE FUN!

GREAT TEXAS BIRDING CLASSIC
