California Bird Records Committee Bylaws	161
INDEX <i>Mildred Comar</i>	166

CORRIGENDUM

Western Birds 8:115, 1977: line 8, Akepa (*Loxops coccinea*) account, should read 2043 m vice 204 m.

Manuscripts should be sent to Alan M. Craig, 3532 Winston Way, Carmichael, CA 95608. For matters of style consult *Suggestions to Contributors to Western Birds* (6 pp. mimeo available at no cost from the Editor) and *CBE Style Manual*, 3rd ed., 1972 (available from American Institute of Biological Sciences, 3900 Wisconsin Ave., NW, Washington, DC 20016 for \$6.00).

Papers are desired that are based upon field studies of birds, that are both understandable and useful to amateurs, and that make a significant contribution to scientific literature. Appropriate topics include distribution, migration, status, behavior, ecology, population dynamics, habitat requirements, the effects of pollution, and techniques for identifying, censusing, sound recording and photographing birds in the field. Papers of general interest will be considered regardless of their geographic origin, but particularly desired are papers dealing with studies accomplished in or bearing on Rocky Mountain states and provinces westward, including Alaska and Hawaii; adjacent portions of the Pacific Ocean and Mexico; and western Texas.

Authors are provided 50 free reprints of each paper. Additional reprints can be ordered at author's expense from the Editor when proof is returned or earlier.

Good photographs of rare and unusual birds, unaccompanied by an article but with caption including species, date, locality and other pertinent information, should be submitted to Arnold Small, 608 N. Camden Drive, Beverly Hills, CA 90210.

THE CALIFORNIA QUAIL

by A. Starker Leopold

The California Quail is a charming bird, with its striking good looks and mellow call notes. Widely distributed along the Pacific Coast, it has long been of interest to bird-lovers, sportsmen, ranchers, and wildlife biologists. The definitive work from both the natural history and game management points of view, this comprehensive report summarizes what is known about the history, biology, and management of the species.

301 pages, 51 photos, 25 line drawings, 7 maps, 41 tables,
31 charts, \$14.95
