

BIBLIOGRAPHY OF WARBLER SONGS.

THE following list of books and periodicals contains only those in which something of use bearing directly upon the subject has been found. General works on birds which contain no mention of Warblers are therefore excluded, but books treating the general subject of bird song, even tho they contain nothing specifically upon the warblers, are included. Neither here nor in the body of the report does it seem desirable to cumber the pages with exact references in the majority of cases. In many of the books the Warblers may readily be found in their systematic position, arranged in the accepted systematic order, and in nearly every book the index will prove a sufficient guide to the page from which the reference has been taken. With periodicals the case is somewhat different, and here specific references will be given where they seem necessary, in the body of the paper.
